

DISCOVER COOL AQUASCAPES

At DesignLuv, we admire and love elements that redefine spaces.

Visualise a living wall in a boardroom of a corporate. How, you wonder! Possible, says Ashwin Sukumaran of Aquaria. And we luv it.

Presenting Chennai's own Aquascapes, to the many who may have admired Takashi Amano's magical displays on the net or maybe, even in person and longed for delightful aquatic displays way beyond the humble tank of fish and its accessories.

An Asian river setting, a Malawi lake effect recreated, Zen and more from the familiar to the exotic. So much is possible.

You need to decide to bring living aquascapes into your life and space. And plan when, where and how to blend it in beautifully.

Talk to us. Experts like Ashwin and Aquaria are best brought in during the early stages of interior designing whether you are building new, or revamping existing life or work spaces.
